

What you need to know about

# Coronavirus

## What is coronavirus?

Coronavirus is a type of virus. Typical symptoms of coronavirus include fever and a cough that may cause shortness of breath and breathing difficulties.

## Should I be worried?

Definitely not! The symptoms are similar to a cold or flu. The vast majority of people that do contract the virus are completely fine in a couple of weeks.

## What if someone is sick?

If anyone in your house gets a fever and cough, they should stay home, and so should anybody else living there. Chances are it's not coronavirus, but whatever it is, it's likely contagious.

## Top Tips

Always carry tissues with you and use them to catch your cough or sneeze.

Bin the tissue, and to kill the germs, wash your hands with soap and water, or use a sanitiser gel.
